Task Description

Tasks for 'participant' tester:

Task 1
- *Context:* You are attending an online presentation and using the webapp Relier to interact with others. Imagine the presenter introduces a new topic.
- *Description:* Let the presenter know that you are following along well.

Task 2
- *Context:* You join a call with colleagues and greet the others using the chat.
- *Description:* Send a message in the chat.

Task 3
- *Context:* The presenter mentioned something you don't understand and you want to ask him a question about it.
- *Description:* Add yourself to the question queue.

Task 4
- *Context:* The presenter lets you speak and answers your question
- *Description:* Remove yourself from the question queue.

Task 5
- *Context:* Presenter gives the audience a multiple choice question
- *Description:* Answer the question using emoji characters (ex using 🅰, 🅱 emoji)

Task 6
- *Context:* Everyone from the audience finished voting and you want to know which answer got the most votes.
- *Description:* View audience's votes in a bar chart.

Task 7
- *Context:* You want to see if your friend is attending the presentation.
- *Description:* Check people connected to the app.

Task 8
- *Context:* The presentation just finished and you want to let know the presenter you enjoyed it.
- *Description:* Give the presenter a love-reaction.

Tasks for 'presenter' tester:

Task 1
- *Context:* You are presenting a topic of your liking to an audience and want to make sure you're explaining things well to participants.
- *Description:* Assess how your audience is following along.

Task 2
- *Context:* You start your presentation with a funny comic and want to see how the audience reacted.
- *Description:* Check the reactions panel and see the emojis with the highest count.

Task 3
- *Context:* You have reached the QA part of your presentation.
- *Description:* Check who is the next participant in the question queue .

Task 4
- *Context:* You just finished answering a participant's question.
- *Description:* Delete the person who just spoke from the question queue.

Task 5
- *Context:* You want to assess participant's understanding of your presentation and ask them a multiple choice question.
- *Description:* See participant's answers, noting how many got it right and how many got it wrong.

Task 6
- *Context:* You just finished your presentation and want to see if any participants are still connected to ask them for personal feedback.
- *Description:* Check who is left in the presentation.
